The original Study of Texture Afghan was finally designed in March 2018. I had created an afghan in 2014 using Bernat Mosaic Yarn but lost my way partially the way through and began to freeform. I freeformed to the point where I was unable to write the pattern. Blue sample below is the original 2014 version.

Daniel challenged me since Caron Cakes have surfaced in 2016 to recreate my original design. As you can see, there is some close resemblances to the original design but I have learned new skills and strengthened my pattern design skills since then.

While watching TV when designing, we were watching a food show where the chef was doing a study of berries. I thought instantly, I'm doing the study of texture for the stitches we are playing with. The name Study of Texture Afghan was developed.

The afghan was intended for learning purposes and pushing crocheters beyond their norm to try something new.

Crocheters wondered if the afghan could be made into a shawl. I figured the re-design to shawl format would be easy but realized a 2 rows in that converting the pattern isn't theory. It had to be done from scratch.

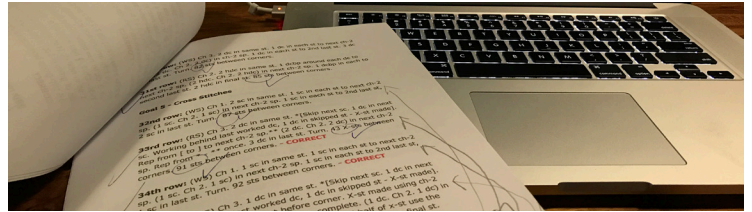

The difference between the afghan and the shawl is the direction in which you crochet. The afghan is done in a continuous revolution without turning at the end of the rounds. The shawl requires you to turn.

With turning after each row, you end up with a right side (RS) and wrong side (WS). The RS is what people see. So extra thought had to be applied to how the stitches are going in because the texture could be on the wrong side of the project.

## Changes in Comparison to Afghan

1. The popcorn row was shifted by 1 row as the popcorns would have been on the back.
2. I eliminated 1 layer of basketweaves out of the shawl as I got sick of doing the stitch and wanted to try to do something different with the edging. It also would impact the final scalloped border for final number to hit.
3. The final scalloped edging is from Yarnspirations, Comfort Shawl. There is a mathematical number to hit to be able to do the scallops and I needed to hit that number and ended the basketweave earlier than the afghan to hit that number without having to do several more rows to get to the next multiple required to do the scallops properly.

## Special Recognition

We have several testers who volunteer their time to test our patterns. Though you may find errors in this design, we did our best to locate as many errors as we could. I will put a revision number on the next page in the event more errors are located.

We closely went through each detail from RS or WS and provided stitch counts at the end of each instruction. Where the testers and myself would screw up is when a half double crochet is going into the corner. The 2nd hdc before turning the corner can be misleading and skipped by accident. So if anywhere a crocheter will lose count is when a hdc is in the corners.

Testers include Diane, Michele, Wendy, Anita and myself.

The pattern was written during prototype stage and heavily reviewed and edited. Once most of the pattern was edited, the Blushing Melon sample is the final run through to catch the remaining grammar and double checking stitch counts.

Thanks so much girls for helping me.

### Revision 2

### Goal Posts

I have set up the instructions to be divided into goals so that you feel like you are getting somewhere in the pattern. I find setting goals allows me to sit for extended periods of time to attempt to hit the goals.

### Special Notes

- Ch 2 at beg of rnd does not count as hdc.
- Ch 3 at beg of rnd counts as dc.
- Hdc stitches, especially when on a corner can make the stitches misleading. If losing count of stitches, look to the last hdc before turning the corner as it may be hidden to use.
- Working from the center of the ball, match outside color of previous ball with next ball of yarn to achieve best results.

## Goal 7 - Scalloped Edging
