

# Gauge Workshop

## MEASUREMENTS

Approx 40 x 44" [101.5 x 112 cm].

## GAUGE

11 sts and 6 rows = 4" [10 cm] in Wave Pat.

## Pattern Gauge

Gauge states 4". This means 4" Square.

## How to Measure

- Measure and count how many stitches are within the designated gauge. In this case, 4" width.
- Measure and count how many rows are within the designated gauge. In this case 4" height.
- Compare to project gauge.

### Decisions

- If your gauge matches project gauge, your project will match the pattern dimensions.
- If you have less stitches in the gauge width, your project will be bigger. Reduce hook size.
- If you have more stitches in the gauge width, your project will be smaller. Increase hook size.

## Measure Sample Swatch
