Inside Bottom Pad

Repeat rnds 1 - 7 from bottom to sides section. Fasten off.

Assembly

Place Bottom & Side Piece on table. Lightly stuff the middle bottom section. Place the inside bottom pad, right side up, into the middle and sew the middle bottom into position. Do not over stuff the base as it will create a mountain hill in the center of the basket.

Next, equally spread the fluff in the bottom sealed section. Then sew the middle section down to the middle of the one middle to the other.

With the side, fold down the side with adding lots of polyfil stuffing for more firmness to fill it in on the inside of the basket. Sew the top edge of the side to the bottom.

Bottom and Sides Section

Make Inside Round Pad

Sew inside pad with stuffing between the bottom into position.

When inside pad is sewn, the middle section has stuffing for kitty comfort.

Fold down the edge and apply stuffing to create the inflated ring they use to keep inside the basket.

Let rest on floor and invite kitty to explore. Do not force the kitty to use it. Walk away if necessary.

Kitty will come and examine your stitchwork and determine if a cat nap trial is in order.

Kitty eventually moves in and this is their safe spot. This took about 24 hours without forcing the cat to use it.
