### Yarn

**Bernat® Pipsqueak™**, 100g / 3.5 oz, 92 meters / 101 yards - 1 Ball (using 2 balls at same time is easier).

**Caron® One Pound™**, 454g / 16 oz, 742 meters / 812 yards - 1 Ball Red (using 2 balls at same time is easier).

Pom Pom is using Caron One Pound - White.

Hat weighs approximately 77 grams. Yarn uses is a #4 medium Weight that works better for this style of loom. Hat will fit an average adult. Sizing for ladies and mens is in the pattern.

### Loom

- 9" across the pegs.
- It's the 3rd largest size in this kit.

**Pictures show how the brim is done. Video tutorial about changing colours as brim is also available.**

### Notes

The hat has a permanent fold to form the clean edge brim. You will need to count the cross strings when doing the brim, then the remaining of the hat is done through using a tape measure.

### Instructions

Cast on all pegs using Twisted Knit eWrapping double stranding Bernat Pipsqueak.

**Brim Panel:** Knit until you can count cross string rows from the pegs to the edge of the project. There are 17 rounds which equals 17 cross strands.

Pictures are from the baby size but the brim, other than the number of rounds, is formed the same way.

**Form Brim:** Follow first peg to where the starting slip knot is. Take the last strand and put it onto the same peg. Then grab next strand and put it onto the next peg. Follow around until all pegs have the beginning cast on round.

Fasten off Bernat Pipsqueak and change to Caron One Pound Red.

eWrap the loom and throw the two strands over the last eWrap leaving 1 loop on peg.

**Body of the Hat:** As shown in the video, place a stitch marker before starting the next round so you can easily count the cross strands from this point to the end. eWrap and Knit until approximately 23 rounds for ladies or 25 rounds for men.

Fasten off by cutting strand about 24". Using tapestry needle. Insert needle through next loop and pull strand through while lifting the loop off the loom. Continue around until all loops are on the strand.

Pull strand tight to close top of the hat. Secure loose ends.

**Pom Pom (Optional):** Using 3" diameter pom pom maker. Wrap pom pom maker and form pom pom. Demonstrated in video tutorial. Secure to the top of the hat using a bow tie so the pom pom can be removed in the event the hat needs washing or the recipient doesn't like pom poms.
