### **Mikey O Matic Yarn Feeder**

This concept requires the usage of the inside and outside of one yarn ball.

The shade of the exterior of the ball versus the interior are completely unique. The yarn will do the perfect phase making each square unique.

Blue prints on the article have been provided to make the feeder and a video on how to use the feeder. Making the feeder will allow you to use both sections of the same yarn ball without tangles.

### **How to Read This Pattern**

Colour A has been listed as either Inside or Outside. Same with Colour B.

Pay careful attention to which strand to use for each ball.

The best way to make one square is to do one square from

start to finish. This will allow the colours to phase perfectly.

Do not carry the yarns that are not in use. Cut and weave tails when not in use.

The diagrams for the square are provided but there's a lot of overlay in the middle of the circle. The diagram has been split out to be easier to read.

Once you finish the one square, complete the next square so the colours are completely opposite.

### **Each Square Weights**

A - 12 grams of Yarn  
B - 22 grams of Yarn

Follow the instructions below to have equal amount of yarn used as you will end with an imbalance
